mariCloud

Epidemiological data of respiratory infections on your own desktop

ArcDia's mariCloud™ is an online service for realtime surveillance of infectious diseases.

mariCloud™ collects test results from all analysers and reports infection prevalence statistics to mariCloud™ users.

You can now follow the epidemiological picture of your region real-time.

WHY mariCloud™?

- Optimize antibiotic and anti-viral use
- Epidemic and infection control
- Pandemic preparedness
- Surgery planning
