

maripoc

Quick Flu/RSV

Influenza A virus
Influenza B virus
Respiratory syncytial virus

mariPOC® Quick Flu/RSV test detects the three most common viruses from one nasopharyngeal sample in 20 minutes. This test outperforms conventional immunochromatography tests in sensitivity, specificity and reliability.

**10 x more sensitive than
conventional rapid tests!**

One sample -
three answers

Results in
20 min on-site

Automated analysis
and result reporting

Quick StrepA

Group A streptococci

mariPOC® Quick StrepA test reports the final result in just 15 minutes.
The sensitivity of Quick StrepA is equal to a standard bacterial culture.

No need for a bacterial culture!

All positive in
15 minutes!

		Bacterial culture	
		positive	negative
mariPOC®	positive	38	1
	negative	1	153
