Please select
respi
respi < 7 years old
Quick Flu/RSV

Select test type between **respi**, **respi < 7 years old** (without pneumococci) or **Quick Flu/RSV**.
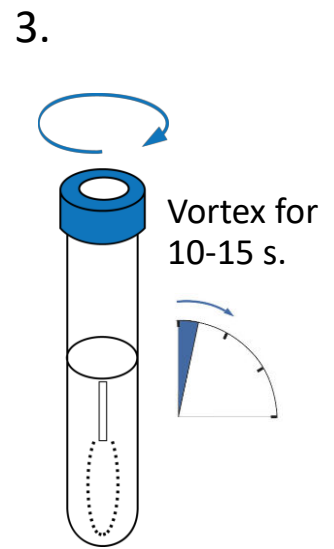

Print

Print bar code label and attach it on the mariPOC® sample tube.

1.

1-2 cm
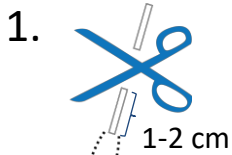

Use only flocked swabs for sampling.

Disinfect the scissors between samples.

2.
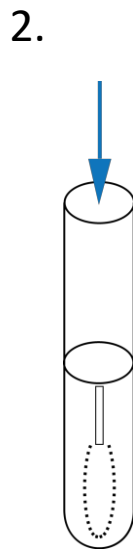

Add 1.3 ml of RTI sample buffer.

3.

Vortex for 10-15 s.

Insert the sample tube in the analyzer. Patient information should be seen through the gap.

Close the sample hatch. Automated analysis starts.

Results reporting

Respi — Preliminary results in 20 minutes
Final results in 2 hours
